

Abdelwahab Ahmed

Flutter Mobile Developer | Android Native Integration | Clean Architecture

Cairo, Egypt | +20 121 155 2340 | abdomoshref67@gmail.com | [LinkedIn](#) | [GitHub](#) | [Portfolio](#)

PROFESSIONAL SUMMARY

Flutter Mobile Developer with hands-on experience delivering cross-platform Android and iOS apps using Flutter, Dart, and Clean Architecture. Completed the Flutter Diploma at NTI with 100% (Distinction) and has since delivered multiple freelance client projects, including a multi-role workshop management system and native Android payment integrations (Paymob SDK via Method Channel). Comfortable owning a project end-to-end: architecture, state management (Bloc/Cubit), Firebase backend, and native platform integration.

TECHNICAL SKILLS

Languages: Dart, Kotlin (Method Channel Integration), C++, Python

Mobile & Cross-Platform: Flutter, Android Native Integration (Method Channels)

State Management & Architecture: Bloc/Cubit, Clean Architecture, MVI, MVVM, Feature-First

Backend & APIs: Firebase (Firestore, Auth, Realtime DB, FCM), Node.js/Express, REST APIs, Dio, GetIt (DI)

Payments & AI: Paymob SDK (Native Integration), Gemini AI API

Tools: Git, GitHub, Jira, Figma, Postman

PROFESSIONAL EXPERIENCE

Freelance Flutter Developer — Remote

Jan 2025 – Present

Car Style — Car Workshop Management System (Client Project)

- Built a full-scale workshop management system with three role-based portals (Admin, Mechanic, Customer), each with a tailored dashboard, order management, and technician assignment flow.
- Architected the app with Clean Architecture and the MVI pattern using Bloc/Cubit, backed by Firebase (Firestore, Auth) for real-time data sync across all three roles.
- Designed and deployed a custom Node.js/Express backend integrated with Firebase Admin SDK to trigger real-time FCM push notifications for order and assignment alerts.

Paymob SDK Integration (Client Project)

- Integrated the Paymob payment SDK into an existing client Flutter application via Android Native Method Channel, enabling secure in-app payment processing.

Flutter App Performance Optimization (Client Project)

- Diagnosed and resolved freezing and crashing issues in an existing Flutter app, delivering a fully optimized, stable release — earning a 5-star client review.

Flutter Developer (Team Project) — National Telecommunication Institute (NTI)

Dec 2025

- Built “Cinema,” a movie discovery app consuming the TMDb REST API, surfacing 500,000+ titles with real-time search and advanced filtering.
- Optimized data fetching with a caching strategy, cutting network fetch time by 40% and improving perceived load speed.
- Collaborated with a development team using Git, GitHub, and Jira in an Agile workflow.

ADDITIONAL PROJECTS

github.com/abdo00ahmed

Volt — Fitness & AI App

- Building a cross-platform fitness app with Clean Architecture and Bloc, integrating the Gemini AI API for personalized workout plan generation and Paymob SDK for secure payments.

News Reader App

- Developed a real-time news app with categorized feeds, search, and local bookmark persistence, using Dio with a retry/error-handling layer for unstable network conditions.

Tasky — Productivity App

- Built a task management app with real-time sync via Firebase Firestore; redesigned the task-creation flow to cut the number of steps roughly in half.

EDUCATION & CERTIFICATIONS

B.Sc. in Computer Science — Al-Obour Institute | Expected June 2027

Flutter Diploma — Grade: 100% (Distinction) — National Telecommunication Institute (NTI) | Dec 2025

SOFT SKILLS

Client Communication, Problem Solving, Agile/Scrum Collaboration, Code Review
